I am a fourth-year Ph.D. student. My research interests lie in the fields of natural language processing and deep learning. In particular, I am interested in building more robust and secure natural language generation algorithms and focus on:

- The robustness of converting a database schema related question into a SQL query.
- Watermarking for Large Language Models.
- Safety alignment of Large Language Models.

• Project: Trusworthy of Large Language Models

Apple AIML Group

Research Intern

Mar 2023 - Present

- Project: Prompt Difficulty Evaluation, Safety alignment for LLM
- Accomplishments: 1) Developed a LLM-based automatic attributes identification methods for prompt difficulty evaluation. 2) A safety alignment method for LLM that does not require manual annotation of preference data.
